DETAILS OF THE COURSE

Duration	:	30 Hours
Eligibility	:	Interns / final year B.D.S/P.G students
No of Admissions	:	10
Method of Teaching	:	Lectures

FACULTY

This course is graded as satisfactory/ Unsatisfactory/Good/Exemplary
To receive a satisfactory grade in this course students must complete the following

- A. Participation in all lecture's sessions.
- B. Successful completion of the Post Evaluation exam

COURSE OUTCOME

The primary goal of the program is to provide students with the following core learning outcomes:

1. Need for decontamination and disinfection in hospital.
2. Methods of decontamination and Infection control in healthcare facilities
3. Decontamination of dental equipment's and facilities
4. Cross contamination
5. Best Practices for Dental Equipment Sterilization and Disinfection

COURSE HIGHLIGHTS

- ✓ RESEARCH WRITING -A INTRODUCTION
- ✓ HOW TO WRITE A DENTAL ARTICLE
- ✓ STUDY DESIGNS
- ✓ PLAGIARISM
- ✓ CHOOSING A JOURNAL
- ✓ UPLOADING A MANUSCRIPT & CHECK LIST
- ✓ CORRECTION PROCESS FOR PEER REVIEW
- ✓ CITATION & IMPACT FACTOR

COURSE OUTLINE

LECTURES

In this course, lectures are planned to understand research writing. Publications have become one of the important criteria for academic performance and staff appraisal. Writing a manuscript and publishing in an indexed journal requires guidance and support, The course acts as a live workshop and training guide for research writing and publishing .

COURSE CONTENTS

LECTURES

- ✓ Research writing (1hr)
- ✓ Study designs(1hr)
- ✓ Ethical needs(1hr)
- ✓ Plagarism check (1hr)
- ✓ Writing methodology(1hr)
- ✓ Grammar and knowledge (1hr)
- ✓ Templates for guidance (1 hr)
- ✓ Do and donts of research writing (1hr)
- ✓ Publication in a indexed journal (1hr)
- ✓ Guidelines for writing original research, Case reports ,Systemic review (1hr)
- ✓ References and methods(1 hr)

WORKSHOP

- Writing for a scientific journal manuscript (1hr)
- Writing - Writing good titles, bstracts, Methods, Table, Figures, Results and Discussion (1hr)
- Writing abstract for conference presentations (1hr)
- Literature Search Reference Management(1 hr)
- How to select a journal & submission process (1 hr)
- Peer review & responding to eviewers comments(1hr)
- impact fac

DEPARTMENT OF PEDIATRICS AND PREVENTIVE DENTISTRY

Healthy Kids = Happy Kids

VALUE ADDED COURSE IN
NUTRITION AND CHILD DENTAL HEALTH

COURSE HIGHLIGHTS

- Introduction
- Classes of nutrients
- Components of diet
- Basic food groups
- Balanced diet
- Nutrition considerations in pediatrics
- Diet and oral health.

COURSE OUTLINE

LECTURE

In this course lectures are planned to understand basic concepts behind nutrition and child dental health. Successful diet counselling depends on the ability of the clinician to make the patient see the problem clearly and thereby work upon its solution. It emphasizes the importance of nutrition and balanced diet in children and its relation to origin of diseases. This lecture enlightens more on Classes of nutrients, Components of diet, Basic food groups, Balanced diet, Nutrition considerations in pediatrics and its importance on oral health.

LIVE DEMONSTRATION

Live demonstration will be given to the participants on basic food groups, classes of food with different nutritional advantages, foods to eat and not to eat, balanced diet with its effect on oral health.

Cultural Trust

COURSE OBJECTIVES

- Importance of ergonomics in day to day practice
- Proper positioning of patient and dentist
- Four hand dentistry and its importance
- Muscle strengthening exercises

COURSE OUTLINE

In this course importance of posture maintenance during dental procedure by the operator will be taught. Clinical sessions explaining the doctor and patient positioning will be discussed for clinical correlation by the students.

COURSE CONTENTS

1. Importance of posture maintenance
Hands on Training, Hands on training will be provided in minimum of 5 cases.

COURSE DESCRIPTION

Ergonomic posture maintenance has become a prime importance especially for dentist due to the occupational hazard resulting in severe neck and back pain which can hamper once professional life. Many dentists are affected with chronic neck and back pain in various stages of their career. In this course the importance of maintaining a proper operating posture and finding out the root cause of these chronic pain will be discussed. Few basic muscle strengthening exercises will be taught to the participants for effective muscle strengthening.

CERTIFICATE COURSE MEDICAL EMERGENCIES IN DENTISTRY

DEPARTMENT OF ORAL MEDICINE AND RADIOLOGY

COURSE HIGHLIGHTS

Medical emergencies can occur in dental practice. This course is framed to help the dental care professionals to respond effectively and safely to a medical emergency situation.

This course will be co-ordinated by a dental team along with a General Medicine expert. Out patient department visits are also arranged.

COURSE CONTENT

- Introduction to medical emergencies
- Review of systems
- Central nervous system
- Cardiovascular system
- Respiratory system
- Gastrointestinal system
- Genitourinary tract system
- Drug usage
- Visit to medicine out patient department (Clinical Scenario)
- (Micro Workshop) Practical case scenarios

Total hours - 36 hrs. Lecture hours - 21 hrs. Out patient department visit - 7 hrs

DAY 01

- 08.30 am - 09.30 am = Introduction to emergency medicine
- 09.30 am - 10.30 am = Importance of case history documentation
- 10.45 am - 12.45 pm = Review of systems
- 01.00 pm - 03.00 pm = General Examination and its significance
- 03.00 pm - 05.00 pm = Co relation of History, Signs and symptoms

DAY 02

- 08.30 am - 10.30 am = ABC of Emergency medicine
- 09.30 am - 10.30 am = Basics of Emergency room management
- 10.45 am - 12.45 pm = Acute myocardial infarction and its early complication
- 01.00 pm - 03.00 pm = Management of hypertensive crisis
- 03.00 pm - 05.00 pm = Cardiac emergencies

DAY 03

- 08.30 am – 10.30 am = Thyroid emergencies
10.45 am – 12.45 pm = Other endocrinal emergencies
01.00 pm – 02.00 pm = Acute liver failure
02.00 pm – 05.00 pm = Bleeding and Clotting disorders

DAY 04

- 08.30 am – 10.30 am = Dental management of Medically compromised patients
10.45 am – 12.45 pm = Dental management of Medically compromised patients
01.00 pm – 03.00 pm = Emergency drug usage
03.00 pm – 05.00 pm = Discussion

DETAILS OF THE COURSE

DURATION	:	30 hours
ELIGIBILITY	:	3rd years BDS
NO.OF ADMISSIONS	:	15 per batch
METHOD OF TEACHING	:	Lectures, Demonstration, Hands-on

COURSE OUTCOME

Participants attending the program can perform oral cytology smear taking and staining the smear with PAP stain

INSTRUCTIONS TO PARTICIPANTS

- Materials & instruments required will be given to the participants

PLENARY SESSION

- A. The participant will be graded as Unsatisfactory/ Satisfactory/ Good/Excellent.
B. To receive a Satisfactory grade in this course student must complete the following:
1. Participation in all of the lecture and hands on sessions.
 2. Completion of all the designated work.

COURSE HIGHLIGHTS

- Introduction to Exfoliative cytology
- Purpose of Exfoliative cytology
- Procedure of Exfoliative cytology
- Interpretation of results

COURSE OUTLINE

LECTURES

In this course, lectures will be planned to impart knowledge on the basic concepts, procedure and result interpretation of Exfoliative cytology. Lectures will emphasize on Smear preparation and PAP staining.

DEMO

Live demonstration will be given to the participants for Exfoliative cytology and PAP Staining procedures.

HANDS - ON

The participants will be able to perform Exfoliative cytology and PAP Staining procedures.

COURSE CONTENTS

LECTURES

- Introduction to Exfoliative cytology
- Cell collection
- Smear preparation
- Fixation
- PAP Staining procedure
- Mounting
- Microscopic examination
- Interpretation of Results

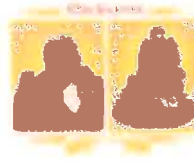

DEMO AND HANDS - ON

- Cell collection
- Smear preparation and Fixation
- Staining and Mounting

COURSE HIGHLIGHTS

- ✓ Materials Used In Bleaching
- ✓ Bleaching Techniques
- ✓ Lectures And Hands-On Covering Basic Science To Recent Advances In Veneers
- ✓ Hands -On On Extracted Tooth

COURSE OUTLINE

LECTURES

Series of Lectures will be conducted on basics in veneers, preparation techniques for various types of veneers, cementation techniques, challenges faced in preparation for veneers, Bleaching, various materials available in market for bleaching, different techniques used in bleaching

DEMO

The participants will be attending live demonstration of various preparation techniques for veneers, preparation techniques, temporization and cementation procedures, demonstration of Tooth Bleaching procedures.

HANDS-ON

Hands - On will be conducted on extracted typhodont tooth.

COURSE CONTENTS

LECTURES

- Introduction to Bleaching(1 hr)
- Diagnosis and Treatment planning(1hr)
- Mechanism of Tooth Bleaching(1hr)
- Isolation(1hr)
- Materials used in Bleaching (1hr)
- Vital bleaching(1hr)
- Non vital Bleaching(1hr)
- Advantaged and Disadvantages of Bleaching(1hr)
- Challenges faced during Bleaching(1hr)

DEMO AND HANDS-ON

- Isolation of teeth for Bleaching(1hr)
- In office bleaching(1 hr)
- Night Guard bleaching(1 hr)
- Walking Bleach(1 hr)
- Hands -On(5hr)

TOTAL HOURS - 18 (LECTURE- 9 DEMO AND HANDS-ON - 9)

Participants Will Be Provided With Instruments And Materials To Work

The Modules for this course will be held between 18th
November 2021 to 23rd November 2021

MODULE 1:

LECTURE: (4HRS)

- Introduction to Bleaching
- Diagnosis and Treatment planning
- Mechanism of Tooth Bleaching
- Isolation

Demo And Hands-On: (2Hrs)

- Isolation of teeth for Bleaching

MODULE 3:

LECTURE: (2HRS)

- Advantaged and Disadvantages of Bleaching
- Challenges faced during Bleaching

DEMO AND HANDS-ON: (4hrs)

- Night Guard Bleaching
- Walking Bleach

MODULE 5:

LECTURE: (3HRS)

- Shade selection and Temporization
- Cementation techniques
- Plenary session

DEMO AND HANDS-ON: (3hrs)

- Temporization and Cementation

COURSE OUTCOME

- The participants will be able to understand various concepts involved in teeth whitening
- The participants will be able to select cases accordingly for bleaching and direct veneering.

MODULE 2:

LECTURE: (3HRS)

- Materials used in Bleaching
- Vital bleaching
- Non vital bleaching

DEMO AND HANDS-ON (3 hrs)

- In office bleaching

MODULE 4:

LECTURE: (3HRS)

- Diagnosis and Treatment planning
- Case selection
- Tooth preparation and design modifications for various types of veneers

DEMO AND HANDS-ON (3hrs)

- Tooth preparation for veneers
- Impression techniques

ABOUT THE COURSE

Orthodontic appliances are the devices which transmit forces to individual teeth or maxillofacial skeletal units to bring the changes within the bone with or without tooth movement which will help to achieve the treatment goals of functional efficiency, structural balance and esthetic harmony.

Orthodontic appliances are divided into three main groups:

- A) Removable appliance
- B) Removable-Fixed appliance
- C) Fixed appliance

Removable Orthodontic appliances hold a unique place in the orthodontist's armamentarium. The use of removable appliances still varies between clinicians, but it is possible to achieve adequate occlusal improvement when suitable cases are chosen. Simple tipping movements and few malocclusions will fall into this category.

This course provides information related to construction of the orthodontic appliance and also gives the basic technical knowledge and manual skills to fabricate various removable appliances according to the clinical requirement and laboratory criteria.

Orthodontic appliance fabrication and management Course is certificate course offered by Adhiparasakthi Dental College & Hospital. It comprises of 4-day course for a period of 30 hrs.

PROGRAM OBJECTIVE

The program comprises of didactic lectures and hands on sessions related to Orthodontic appliance fabrication and management. At the end of the course delegates can gain knowledge on various laboratory steps involved in Orthodontic appliance fabrication such as wire bending, construction of the acrylic base plate and clinical management.

COURSE HIGHLIGHTS

Introduction, Orthodontic appliance types, indications, components parts, base plate fabrication, information and instructions for the patient after insertion of removable appliances.

COURSE CONTENTS

DAY 1

Lecture on orthodontic materials,
removable appliances Classy fabrication
demo workshop on class

DAY 2

Lecture on bow Fabrication of
bow demo Workshop on bow

LEARNING OBJECTIVES

LEARN EVERYTHING YOU NEED TO KNOW AND HOW TO APPLY IT IN YOUR RESEARCH PROJECTS AND IN YOUR FUTURE CAREER.

Students should be able to apply the principles of research ethics in their research. This course offers practical insights to make sure that a career does

The course gives you an excellent foundation in research ethics, explaining the basic principles of ethical research and giving you the opportunity to see how the principles are applied in real life situations.

Informed consent, participant selection, risk/benefit analysis, confidentiality, scientific rigour and data integrity are all covered in the materials.

You'll also explore how conflicts of interest and adverse events are handled. This knowledge will prepare you to conduct effective, ethical research in any situation.

LEARNING OUTCOME

The primary goal of the program is to provide students with the following core learning outcomes:

- Apply the basic principles of research ethics.
- Assess and manage the risks of research on human subjects.
- Apply the principles of informed consent.
- Explain the importance of responsible management of research data.
- Explain the concept of conflict of interests in research.
- Describe the responsibilities of the research ethics committee.

COURSE CONTENTS

LECTURE

1. Introduction to Health Research Ethics (1 hr)
2. International Guidelines on Ethical Conduct of Research (2 hr)
3. National Ethical Guidelines for Biomedical and Health Research Involving Human Participants (2 hr)
4. Benefits and Risks in Health Research (1 hr)
5. Responsibilities of a Researcher (1 hr)
6. Rights and Duties of Researchers, Sponsors, Participants and IRB Members Under the Indian Constitution (2 hr)
7. Collaborative Research (1 hr)
8. Academic / Investigator Initiated Clinical Trials (1 hr)
9. Good Clinical Practices & Clinical Trial Registry of India (2 hr)
10. Establishment of Ethics Committees (1 hr)

COURSE HIGHLIGHTS

- Introduction to Medical Emergencies
- Commonly occurring medical emergencies in children
- Basic life support / Cardio pulmonary resuscitation
- Prevention of medical emergencies

COURSE OUTLINE

LECTURES

In this course, lectures are planned to understand basic concepts behind medical emergencies and management in children. Lectures on various medical emergencies will emphasize on diagnosing the condition. Lectures will also focus on the management of the medical conditions.

DEMO

Live demonstration will be given to the participants of cardiac arrest, Anaphylaxis, syncope, Airway obstruction and seizure management in children

HANDS-ON

The participants will be able to perform CPR management in children using model.

COURSE CONTENTS

LECTURES

- Introduction to medical emergencies (9-10AM)
- Commonly occurring emergencies in children (10-11AM)
- 11-11.15 TEA BREAK
- 11.15-1.00PM
- 1. Syncope
- 2. Allergy
- 3. Asthma
- 4. Hyperventilation
- 5. Airway obstruction
- 6. Seizures
 - 1-2 PM LUNCH
 - 2-3PM
- LA Overdose reaction
- Thyroid gland dysfunction
- Adrenal crisis
- Insulin shock and Diabetic ketoacidosis

Dentistry has always been heavily dependent on equipment and deliver to render its high precision services. The equipments and machinery maintenance and service is a significant contribution to the growth of dental practice. Although the technicians would effectively manage the dental chair & equipments service, many a times dentist are facing problems in managing & repairing dental chair & equipments due to unavailability of dental chair mechanics at their nearest proximity. This course aims to inculcate basic knowledge & understanding on functioning of dental chair & equipment and also managing problems that occur in their functioning.

PROGRAM OBJECTIVE

This course is delivered through practical workshop activities and lectures. You will be trained and assessed on practical tasks undertaken in dental chair & equipment repair. The course is schedules for a period of 30hrs(4 days)

Course Outcome :

The candidates should be able to analyse the functions and also able to identify the problems of the dental chair and equipments. The candidate should also be able to perform repair works of minor problems in the dental chairs and equipments.

Course Contents

Day 1 (8 hrs) Dental Equipments
Introduction to dental chair
Parts and functions of dental chair
Demo on parts and functions of dental chair

Day 2 (8 hrs) : Dental equipments

Introduction to dental equipments
Functions of dental equipments
Demo on dental equipments

Day 3 (8 hrs): X ray
Introduction to dental x ray
Functions of dental x ray
Demo on dental x ray

Day 4:
Common problems in a dental chair
Troubleshooting and rectification
Demo on troubleshooting
Duration: 4 days (30 hrs)

COURSE CONTENTS

LECTURE

- ✓ Introduction to Minimally invasive periodontal therapy(1 hr)
- ✓ Why Minimally invasive technique in periodontal therapy (1 hr)
- ✓ Features of minimally invasive periodontal surgery (1 hr)
- ✓ General consideration for minimally invasive technique (1 hr)
- ✓ The Interdental papilla and Papilla preservation flap technique (1 hr)
- ✓ Gingival recession (1 hr)
- ✓ Suturing technique (1 hr)
- ✓ various microsurgical instrumentations (1 hr)
- ✓ How to use surgical loops (1hr)

Total Lecture hours – 9 hrs

DEMO AND HANDS-ON

LECTURE

- ✓ Use of surgical loops and handling various microsurgical instrumentations (2 hrs)
- ✓ Various incision techniques (1 hr)
- ✓ Flap elevation and various Gingival recession procedures (2 hrs)
- ✓ Various Suture technique (1 hr)
- ✓ Modified minimally invasive surgical technique (1 hr)
- ✓ Technical implications and limitations (1 hr)

TOTAL HOURS -17HRS LECTURE – 9HRS DEMO & HANDS-ON - 8HRS

MINIMALLY INVASIVE PERIODONTAL THERAPY

- ✓ Introduction to Minimally invasive surgical procedure
- ✓ Incisions
 - The incisions for MIPS are designed to conserve as much of the soft tissue as possible.
 - The use of Tunnel Technique (TT) in periodontal surgery is considered an important element of MIPS.
 - Single Incision Technique (SIT), for the extraction of SECTG from the palate, is more preferable than
 - using Trap Door Incision Technique (TDIT).
- ✓ Flap elevation
- ✓ Papilla preservation
- ✓ Suture technique
- ✓ The use of microscope
- ✓ Microinstrumentation

CHALLENGES AND SOLUTIONS

LECTURE

Series of lecture will be conducted on basics in Minimally invasive surgical periodontal therapy with the use of various microinstruments, challenges faced while performing microsurgical procedures and how to overcome those challenges.

DEMO

The participants will be attending live demonstration of microsurgical periodontal procedures which features (1) microcraspatorium, (2) bone scraper, (3) papilla elevatorium, (4) microscalpel holder, (5) needle holder, (6) microscissor, and (7) a dental microforceps and microsutures

HANDS-ON

- The participants will be made to work with various microinstruments in a chicken piece or in a preclinical model

PROGRAMME

LECTURE

- A. This course is graded as Satisfactory / Unsatisfactory.
- B. To receive a Satisfactory grade in this course students must complete the following:
 - i. Participation in all of the lecture and hands on sessions.
 - ii. Each participant should complete minimum of 3 microsurgical technique using surgical loops in chicken piece or pre clinical model and their work will be assessed when they come for their review visit.

WHAT TO BRING TO THE WORKSHOP

- The participants should bring chicken piece or pre clinical model
- The participants will be provided with microsurgical instrument kit and materials to work

ABOUT THE COURSE

You need to establish yourself as a professional after completing dental college. Since most new dentists don't start out owning their own practice, you need to know how to begin your career in order for you to turn your dream into a working reality.

It has been observed that almost three-quarters of all dentists choose to become solo business owners. We offer a few practice management topics and also non-clinical aspects of running your practice.

We provide a plethora of valuable resources to meet the educational, networking, clinical, professional issues and practice management, continuing education courses, as well as leadership development programmes. The course is scheduled for 4 days (30 hrs) consists of detailed guidance on setting up dental office & practice management.

PROGRAM OBJECTIVE

The program consists of lectures along with virtual tour to dental clinics covering mandatory checklist for setting up dental clinic including infrastructure, equipment's, staffs, and management of patient and finance. At the end of course, delegates should have clear ideas in dental clinic set up and practice management.

COURSE OUTCOME

The candidates should be aware of the armamentarium needed for setting up the dental clinic. The candidate should also procure sufficient knowledge and skills needed to perform efficient practice management.

COURSE CONTENTS

DAY 1

Practice leadership & goal setting
Location & development
Business name & identity
Designing the dental office
Infrastructure & Floor plan
Planning the operatory room
Planning the consultation room
Reception design

DAY 2

Equipment
Sterilization, Disinfection &
Maintenance
Procedure planning & Personal
Protection

DAY 3

Office staff
Office management &
communication
Office finances
The law & Ethics

DAY 4

Patient motivation
Certification & Accreditation for
clinics
Marketing
Technology & the practice
